A workshop on Optimal Control and Dynamic Games was held on June 2-5, 2005 in beautiful Aix en Provence, France to honor Suresh Sethi and recognize his research contributions. The workshop was organized by Christophe Deissenberg (Univerisite de la Mediterranee) and Richard Hartl (University of Vienna), and they were assisted by the International Scientific Committee members Alain Bensoussan (University of Texas at Dallas), Gustav Feichtinger (Technical University of Vienna), Alain Haurie (University of Geneva), George Leitmann (University of California-Berkeley), and Gerald Thompson (Carnegie Mellon University). Over forty distinguished colleagues and their families from a dozen countries participated in the event. The photos taken by various participants can be viewed at photos.

The conference opened on June 2 with a poolside reception at Hotel Aquabella. Thirty-two papers were presented on June 3 and 4 followed by an introduction of Suresh Sethi and his contributions by Alain Bensoussan. Many of the presented papers are collected in a book, *Optimal Control and Dynamic Games, Applications in Finance, Management Science and Economics*, C. Deissenberg and R.F. Hartl (Eds.), Springer, Netherlands, 2005. A banquet was held on June 4 at the famous Chateau de Meyrargues, which is located a few miles north of Aix en Provence. Ellina Grigorieva (Texas Women’s University) sang melodic folk songs and arias and she was accompanied by Helmut Maurer (University of Muenster) at the piano. The honoree also sang a semi-classical Hindi song. The fun-filled evening concluded with a birthday cake and singing by all. A number of participants went on an interesting and adventurous day-long tour of Provence villages (including the picturesque Louberon and Fontaine de Vaucluse) organized by Charles Tapiero (ESSEC, Paris).
